

VELMIX

COMPLETE CONTROL WITHOUT LOSS

The proof that good things come in small packages, this liquor control system will not take up any space behind your bar! The Vel**MIX** controller is suitable for bars, restaurants, nightclubs and more. Our revolutionary system helps you manage exact quantities of ounces poured and on top of that you will also manage your recipes (cocktails) for consistency. This management system is powerful and reliable, but most of all user friendly

The Vel**MIX** controller allows two types of pouring for flexibility. The programmable spouts can pour a regular or fast flow portions. The Return on investment (ROI) for our system is quite impressive and will help your bar increase transactions and avoid losses. Other peripherals can be added to help manage your bar such as the draft beer controller and the cocktail tower.

Integrated

To ensure reliability, everything is tested rigorously. The entire software can manage: spouts assignment, products calibration, viscosity, out of stock bottle replacement and pouring quantities.

No More Loss

All drinks poured are registered. Possibility to use a memory bar to pour first and redistribute items on the bill after.

Undeniable Control

Possibility to integrate 12 formats (in unlimited format cocktail mode). Since it has a stop function in case the bottle is not full enough to complete a portion.

Unique Spouts

Management of fast flow spouts, the most powerful on the market, allowing to have the same product available in fast flow and in regular flow.

Easy to use

The assignment of a spouts is quite simple. It allows you to seal your bottles without worrying about putting the right spout on it.
