

 VelPAY

## Your all-in-one, fully integrated point-of-sale and payment on one handheld device for fast, flexible, and secure service

VelPAY is a powerful, all-in-one, next-generation ordering and payment solution that combines mobility, speed, and security and is specifically designed for the hospitality industry. This single handheld device integrates all features from the Veloce POS, providing a secure and fast payment processing solution to simplify the management of your restaurant or bar.

### Main benefits

- Increase efficiency and table turnover
- Serve more customers with reduced staff
- Send orders directly to the kitchen from the handheld device
- Lower your costs: no need for separate payment and order terminals
- Speed up service and payment, and serve your customers wherever they are
- Increase average order size and tip amount
- Remove any physical touchpoints for a safer checkout

“

VelPAY allows our employees to manage a transaction from beginning to end while staying with the client the entire time, without having to go back and forth, which greatly optimizes our working times. We strongly recommend VelPAY to restaurant owners.
